

I made three Atari 1025 fonts based on a scan found on AtariAge (<https://atariage.com/forums/topic/287501-hi-res-scan-of-atari-825-printer-print-sample-needed/?do=findComment&comment=4276936>). The user manual also has bitmaps of the international characters:

AAEENDUaaaaaaæëøÿïîŕöøöüüü£

The service manual shows two extra symbols: ¶  
Here are the three fonts:

This is the Atari 1025 Normal font

**This is the Elongated font**

This teeny font is Condensed

I like the numeral "4." It is open at the top.

This document was created in MS Word. The fonts are installed from OTF files.
